Dell’s xPS, powered by the XPS 13, is the most widely used ultrabook in the U.S. Mini PCs offer users a one-stop option that includes a laptop, desktop and mobile device replacement. The U.S. is in the midst of a mini PC revolution, fueled by the need for more computing mobility and creativity. Surging demand for ultrabooks and mini PCs is expected to double in the next 12 months, according to a recent report by Gartner, Inc. The figure’s growth provides a clue that the mainstream adoption of mini PCs is on the uptick. In 2013, Dell’s ultrabooks made up less than one in ten of its consumer notebook sales. That number jumped to over half of the consumer mini PC sales. Dell’s mini PC shipments are predicted to more than double in the next 12 months to 1.6 million units, reaching a potential of around 4.2 million units in 2015, Gartner noted. Among PCs sold in the U.S., ultrabooks and mini PCs both represented around 10 percent of unit shipments. Mini PCs accounted for over 20 percent of netbook shipment growth last year, a segment that saw 35.3 percent growth during 2012. “The U.S. consumer mini PC market is still in its early stages and is not expected to expand to 4.2 million units this year,” said Gartner. “Further, the majority of market share is expected to be in the sub-4.0-inch range.” Gartner also identified Dell’s XPS 13 and the Precision M4600 as the top two mini PCs in the U.S. market. “The Dell XPS 13 is the most popular ultrabook,” explained Gartner. “It 50b96ab0b6
