About This Game

Nothing can be better than well overlooked old, but in new format!

All of us played computer games. And everyone is familiar with the figures in the form of square, line, letters "L" and "Z", with the help of which was created, at first glance, simple, but completely different, and certainly interesting and exciting puzzles. TetrotronVR is completely new look at the usual. Being on the surface of Mars and have limited time you will need using only logic and coordination to fill the gaps in the wall.

This game will be interesting for experienced players and beginners. An intuitive interface, colorful drawing of parts and pleasant system of bonuses will attract the attention not only children but also adults.

But this is not all, this is only beginning! The more you play, the more exciting sequel will be in future. You will be able to make the planet unique and begin journey on your personal spacecraft.

TetrotronVR gives you the opportunity to remember past and find yourself in a space future.

??

TetrotronVR??"L"??"Z"??
